03 Begin to Use the New Brushless ESC

2 ESC/Radio Calibration

During the ESC/Radio calibration, please set the throttle curve to NORMAL and rescale the corresponding throttle amounts to the maximum throttle endpoint and the minimum throttle endpoint on your transmitter are respectively 100% and 0%.

4 ESC Programming

Program Your ESC with a Multifunction LCD Program Box

After adjusting parameter, you need to power your ESC off and then on again. Otherwise, these two parameters won’t take effect.

Program Your ESC with a WiFi Express: For detailed information, please refer to the user manual of WiFi Express.
